Hi Chad, I am interested in getting a quote from you for a website I want to make.

Absolutely. When are you available to chat?

I am right now.

Can you first sign NDA?

I am actually at a swim meet right now. You can send over the NDA to my email: chad@golos.com.

I can do that, what is your name address?

It will be coming from rocket lawyer

QOLOS, INC.
340 N Broadway St STE 200
Green Bay, WI 54303

I would really require one, but my investor wants to me have everyone sign one before i discuss the business

Thank you!

Of course. We sign them all the time

Great, I just sent it.

Jan 23, 2024, 6:32 PM

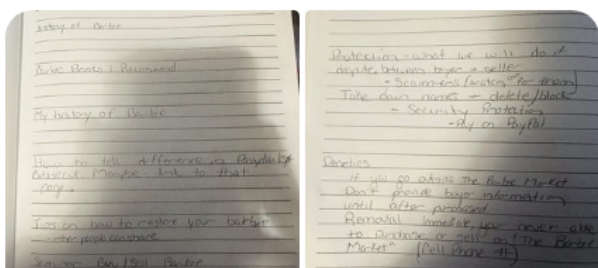

Excited to discuss with you!

Jan 23, 2024, 8:59 PM

Got it all signed. Let me know what works for you to chat.

Okay, we can just chat on here. Also, thanks for quick response. Basically I have a website started on godaddy that's if "The Barbie Market". I want to to be a place that is very Barbie themed. Here are my notes, sorry I wrote like 5 year old boy.

These are my chicken scratch notes.

I can help design if need be. I will probably even write most of it. I just need to be able to have a buy and sell Barbie Website!

Got it. Are you going to be the bank? Meaning: you'll accept payments and distribute them, or is it like eBay where they do it offline?

Like through Venmo or PayPal or Cashapp

They will do it online, would like to use PayPal or Apple Pay, I like their security.

No venmo, no cash so

CashApp is like Venmo

yes, no to both

So you take the payments, it goes to your bank account and then you pay the seller?

um, not sure. However ebay does it.

eBay uses PayPal but the connection is between the buyer and seller. eBay is not in the middle.

Well then like that.

I also would like it to connect to quickbooks.

So Venmo Cashapp and PayPal would all be viable options .

I just trust Paypal.

How do you make money on the transactions? All of them are safe.

I would take 10% seller fee.

Barbie is huge, I have been doing it for about 8 years.

I'm so excited to make site, just don't know how.

I can draw on paper almost, lol.

Ok. I'm going to have to think about how the money flows so that you get your 10%. Do you have a budget in mind?

It would be cool if it was like whatnot, facebook and ebay all in one. Also, have it be a place where Barbie people post like on FB.

probably start with buy it now or make an offer. Then I am going to go to auction school and start doing those. Live actions would be awesome as well.

Launch date of July 2025

I like the make an offer option.

sorry 2024,

Thank you! 🙏

I already own domain

Also. someday have an app

I have a solution for you, but it's credit card only. But we'd be able to split the payment - 10% to you and the rest to the buyer. We are already doing this with other sites. PayPal doesn't have this option. Without the split payment option, this becomes complex. And complexity means more work and a much higher budget. Did you have a budget in mind?

Oops. 10% to you and rest to seller

I don't have good credit, I would just rather pay you.

I meant for taking payments- taking credit cards through the website

Maybe I can get you and my investor together and we can discuss this.

Absolutely

Let me see if he is okay with that.

Jan 24, 2024, 12:13 PM

Haven't heard back from him yet, but can you tell me a little about it. Just trying to get an idea of price for business proposal.

Jan 24, 2024, 12:59 PM

Not saying we would hire you. I like that you're a company and in Green Bay. You seem very professional.

Just price would help or if you could explain credit thing better please.

The cost of the project will really depend on what the project is exactly. There are ways to save money by simplifying things or doing some things in a different way.

Okay, so you don't have ballpark price?

In some cases it's better to find out what the budget is, and we can work within that budget. Otherwise we are scoping out features that are in the budget.

Have you ever made a website like this before?

Ball park price - \$50K - \$150K.

holy shit, okay, nevermind

Yes. I've been doing this for 20+ years.

Anything less than that - you won't have a website that works

What is the cheaper way.

Is there a cheaper way? No way I can afford that.

Simply take credit card payment, and split that payment to your bank and the seller's bank. We have that technology in place. But you are still talking a \$10K project for the simplified cheaper option.

\$10k is workable

This should be huge based on my projection.

Yes I think it's a really good idea. Especially with the offer a price option.

What are fees for this? For example, if someone pays with credit card vs someone pays for it with paypal.

Very similar, what we can do is charge the processing fees to the customer.

So charge the buyer? What are the fees, I don't want this to end up costing every customer a lot more

Also, if they paid with paypal vs credit card, would fees be the same?

Yes, the credit card fees for Paypal and Credit cards are the same. 2.9%

What if they pay with debit card?

Sorry, if I seem stupid, I am just not familiar with this process

A debit card is the same as a credit card...

So basically you are getting 2.9% of every sale?

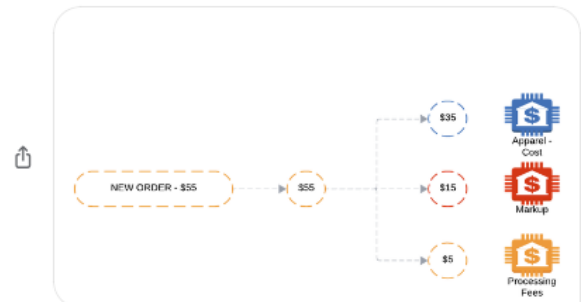

I'm not getting that - the credit card processor does.

but then why would it change price in website so much?

Because of the work involved to set it up. If you are connecting 2 bank accounts - you have to go through bank verification processes, etc. It's a lengthy process. Credit cards are easy to setup

And if you allow a customer to pay a seller directly, you can't collect your 10%.

Then they wouldn't pay the seller directly, I'm new to this.

This is for another project. But how a sale would get split with a credit card transaction.

You can't do that with PayPal Venmo, or any other method.

I would want an option to pay with paypal.

This way buyer protection.

If that's what you want then it's a bigger project. The money will go to your bank account and a customer would need to be able to pull money to their bank account. You would need to store account totals and verify their bank account before you can to an ACH transfer to their bank account. That takes a lot of work and puts the project into 6 figures.

Okay, in the Barbie world most people are scared to put their credit card numbers in because of fraud or someone hacks website.

I feel like every place I shop online has PayPal option. Can we do paypal option, but then also the credit card fee option?

I can afford basically like \$10k

Do you want to just send out checks to the sellers? That simplifies things too.

No, I would want it to go straight into their bank account

Then maybe once it takes off you can automate that.

Can you give me price difference?

Yes, \$10K versus \$50K and up... PayPal doesn't have an option to split the payment - it has to go to 1 account - yours or the sellers.

I disagree on the PayPal thing. Teose people put in credit cards in other places. Ususally you see Paypal on other small sites is because that is simpler for them to take money on their site. I don't think the reason is because people are scared to use credit cards online.

Credit Cards offer teh same protection as Paypal.

Not debit cards

Yes,, becasue if you use a debit card online , you are using it as a credit card, not a debit card.

Yes, but there isn't that type of protection

There is. If you don't use your pin, there is credit card protection. You can dispute a charge.

If I pay with credit card on place and something happens where seller doesn't ship item or item if different from described, how do i offer protection.

Okay

So it is basically \$40,000 to have a PayPal option

Yu raise a dispute with your bank or credit card. They immediately pull the money from the bank account and it goes in to review. Most banks issue teh refund right away.

Yes. Because the approach is much different.

okay, I think I will need to look into different options then. I will get back to you.

Basically there is no way i can afford \$50k, but what the PayPal option.

I thought at most it would be like \$25,000

Yeah, Unfortunately that's the difference between using what's available and a custom option. With credit cards, we are using what Stripe already created. Paypal doesn't offer this so we have to custom build it.

My background is in online payments. Not too many people in this area have that expertise.

Okay, I will let me investor know

Thank you for your time

No problem If he wants to meet to discuss it more, I'll be happy to do that

Question, if I did just do credit card payments online, how do I offer protection as a company? Not make them go back to their banks? Also, if we did it this way would customers need to get checks in mail or could I pay them out like a couple days after?

So, the banks offer credit card protection. They offer this because they want people to use their credit cards. You wouldn't have to do anything.

but how is payment made to seller? I don't want to have to send checks in mail.

You wouldn't need checks. Sellers would register their bank account - there's a process for this. Once signed up, when a buyer pays, the money gets split 10% to you, the rest to the seller

Wouldn't it be 12.9%

Every one's money shows up in their bank account 2-3 days later

That would get deducted from your account before you see it. Teh CC processing company keeps the 2.9%

So we would basically get 7.1%

Nope, because we are charging that to the customer...

So you still get 10%

Okay, so they pay an extra 12.9%

They pay an extra 2.9%

I just saying for total fees it would be a total of 12.9%

yes

okay

Wait, so the buyer pays the extra 2.9% plus taxes. The seller we take 10%, do we add taxes to this?

I'd look into it. I think so, yes.

Technically the seller would have to pay the taxes... you are just a marketplace. So maybe some grey area there. You could potentially have the seller include taxes in their price if they are required to. I'm not an accountant and know enough to be dangerous.

I think I might be able to hire you either way, with or without investor. What sucks is that he already purchased the domain for us and I don't have access to it yet.

Also, can you link this all to quickbooks?

Jan 24, 2024, 6:43 PM

We could link it to quick books. That may be a big project in itself. For me personally, I just take all the revenue from online and put it into quickbooks as a lump sum, rather than synching customers and invoices. It's very simple that way

Jan 24, 2024, 8:25 PM

sounds good, so I should have check by Monday. I'm excited to start working with you.

We will start with the \$10k option an and see if we fall into the 2nd option of \$50k and need to add paypal.

Jan 25, 2024, 12:39 PM

That sounds great. I'm working on a Statement of Work for you and should have that by tomorrow.

Jan 25, 2024, 4:54 PM

awesome, thanks

Jan 25, 2024, 8:37 PM

What's your email address?

Jan 25, 2024, 9:05 PM

bablerjackie@icloud.com

Thank u

Jan 26, 2024, 8:08 AM

It's almost ready. I do have one question. Are products only be available as a su=ingle use quantity - or are sellers able to sell multiple products at a time.

Example: If a seller has 10 of the same thing, would they have to list it 10 times and it's sold 1 per listing or would it be 1 product with an inventory of 10 items.

Jan 26, 2024, 1:32 PM

It would be nice if they could run multiple is need me, but mostly single

Also, I want to do auctions, possibly live auctions

Ok. We can table live auctions for this phase. But tbh at just reminded me about the offer a price

not sure what you mean

The offer a price option for buyers to offer a lower price to the seller

oh yeah "make an offer"

Perfect. The proposal was just sent to your email.

Jan 26, 2024, 2:23 PM

I didn't get it can you try to verify email bablerjackie@icloud.com

bablerjackie@icloud.com is what I have. It could have gone to spam - please check that.

Jan 26, 2024, 2:45 PM

Otehrwise: Here's a link:

<https://app.pandadoc.com/document/f1d8d29770f7aa34262cd8b4217079053c69fdeb>

PandaDoc

Okay, also I started website on go daddy, just very basic, should i just close that or what should i do?

We can transfer that over to the new site No the site, the domain

okay, my investor started it should i get log in information from godaddy? Also, I can see document here, cant sign it and checked both, no email received.

You'll need the login information for GoDaddy from your investor

Maybe I set it up that I need to sign first. I'll check in a minute

Jan 26, 2024, 3:49 PM

OK, I signed the document. You should be able to sign it now.

Jan 26, 2024, 5:04 PM

I should be able to get started early next week - probably on Monday, if not on Tuesday. An invoice was sent to your email address. Once that is settled, we are ready to go!!!!

Jan 26, 2024, 5:26 PM

Okay, great, thanks

Jan 26, 2024, 5:54 PM

also, does this include the shipping process and printing shipping label?

The seller would be responsible for their own shipping label.

How much would it be to add that?

I also don't want name or address given until the buyer pays

YEes, They wouldn't have any buyer info until payment.

Maybe I can just give a link to pirateship.com, but let me know how much please.

Free UPS and USPS shipping software | Pirate Ship

Shannon do you and morgan or anna want to go? Maybe if you chip in some, they can both go.

sorry wrong person

You could certainly direct them to Pirateship and they could manage it themselves. But to connect each seller to a shipping vendor would be a difficult process and then you are forcing each seller to create an account. It's much easier to just let them ship using their favorite process.

We've used Ship Station in the past for this type of relationship, but we were dealing with other businesses and many of them already were using it.

It may be a big ask for a person that this is just a side gig for them.

So basically I would need them to do free shipping, because how is buyer supposed to know shipping price. How is seller even supposed to know

This is a must and should have been included in the \$10k

Just a simple website I can make myself, Even I can hire someone for \$1,500 to do more elaborate site. I am paying \$8,500 more so that this is like ebay experience.

Yes, they should include shipping in their price.

So this needs to be determined ahead of time. Needs to be calculated when they list the item.

Or they could add shipping as a fixed cost to the product.

Correct

No, I need actual cost, so should be easy to create shipping label.

What makes it tough, is that the sellers are in control of their product. So it's the seller's rules. You don't have that control like you would in a traditional e-commerce store.

This is the most money I have ever spent on anything in my life, I am taking a huge chance and have no investors anymore. Please can we work together. Life is a blink of the eye compared to eternity

I want it to be like ebay

or mercari, sites like that

Ebay sellers set their own shipping costs and create their own label.

Okay, I need that done on this website

I got your name from my post, looked you up and you had good reviews. Figured with so much experience with this and is discussing what I want I figured this was a good match. The biggest marketing for you is going to be word of mouth. The previous investor is a HUGE deal, has about 300 businesses. He would be a great person to know. Would love to be able to give you a great review and have you meet with him.

Only reason he isn't still working with me is because I decided to fund it myself, so I don't have to give him equity.

That would be fantastic. I want that too. I've gotten a good reputation because of my honest approach and my ability to get things done

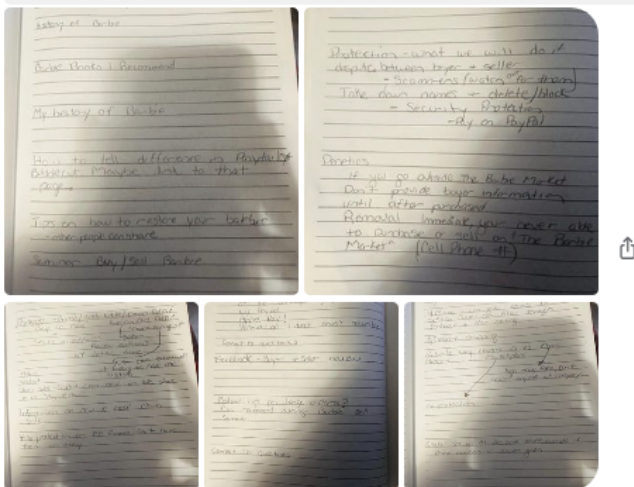

Great, he is HUGE in this world, so huge potential for you.

He was one of Trumps advisors.

He knows Barbara from Shark Tank

any buy and sell website like ebay, has a check out process and has shipping included.

I guess I didn't really read the contract because figured we were on same page.

here are some note

I also need people to be able to leave reviews on each other

Also, your rate is not right, sorry i should have reviewed this.

We can certainly add shipping labels, but we'd have to change the budget. Keep in mind that Ebay spent millions on development. So we can't start with everything that Ebay has. The baby step budget is for sellers to buy and print their own labels - Pirate Ship is a good solution for them to do that.

*millions

Reviews were included in the estimate.

10,000/150 average for this work=\$66.66 average for USA is \$45

Are you saying the average agency rate in the US is \$45 per hour?

yes

I had a guy who was going to make a basic site with my needs for \$1,500

Decided I should go through business, you had good reviews so decided to use you.

I want to be wowed

Then I can give my investor your information

I'm not a basic site person. And this isn't a basic site. But most places in Green Bay are charging \$125-\$150 per hour.

<https://www.freshbooks.com/hub/estimates/how-much-do-web-designers-charge#:~:text=Hourly%20Rate&text=Website%20Builder%20Expert%20estimates%20that,%24100%20to%20%24180%20per%20hour.>

How Much Do Web Designers Charge?
A Pricing Guide

Okay, looks like fair price then. I just want to be able to trust you completely, but I do need to be able to determine shipping when the party lists an item. Then be able to have them print a shipping label. Some items might cost \$10, but shipping ends up being like \$100

I'm losing trust already

My investor said he could do website for me, connect it to quickbooks and everything.

You should do that then. Sounds like a great deal.

I decided not to go through investor instead hire you, so I told him no. Now we are on two different pages. I hired you for \$10k to do a really good website. In order to buy and sell online you need a shipping system. I thought that was a given when we talked

I am taking all the money I have and giving it to you, please don't screw me over.

I agree, it'll be a really good website. I also gave you a range of \$50K - \$150K to build something with all the bells and whistles. I stripped out a lot so you would have something within budget. That affordable price lets you get started, get some money rolling in, and then you can start to add in more bells and whistles, based on customer feedback.

What I can't do though, is start building in all the bells and whistles that we stripped out, at the budget price.

Can't believe shipping wasn't included in original. I don't want to link the buyer and seller together.

Linking the buyer and seller together is exactly what you are doing, Amazon does

this if they sell 3rd party. The seller gets the buyers info and ships it. Amazon pays the shipping to the seller.

* For Amazon prime customers.

And Amazon takes 20%.

Okay, maybe I can say please include shipping price with purchase price, or have that option to add shipping.

Correct. That's the easiest way to handle it. When a seller creates a product, they can either include shipping in the price of the product, offer free shipping, or add a shipping cost to the product.

Okay

When they make the listing they would do this, not when setting up profile.

Correct. They would set the price of the product and choose free shipping or add a fixed shipping cost to the product.

great, that works

Jan 29, 2024, 1:09 PM

How do i go about paying you first portion?

Also, I would need done before July, if that's okay?

Jan 29, 2024, 2:28 PM

I tried to pay but it says declined, I followed up with my bank, they said they increased my limit and it must be getting declined on your end.

I'll take look in a minute. If you just increased your limit it's possible that it takes a bit for that change to go through. Other options are ACH, check, PayPal or Venmo

The code we are getting is that the transaction is blocked.

Your first tries had a different code:
The bank returned the decline code `card_velocity_exceeded`.

My guess is that because you had several attempts, your bank has put a hold on any more attempts.

Jan 29, 2024, 3:37 PM

Do I need to pay the entire \$10,055 now?

Just want to make sure I am happy with site before I pay everything.

Business was registered today, so we should be good to go.

We can opt for a payment split, with \$5,055 upfront and the remaining \$5,000 due in 30 days. By that point, we'll have the website design completed, marking a crucial milestone for advancing to the second half of the project. It's worth noting that a significant portion of our work is front-loaded in the initial stages.

okay

Can you send me invoice for 1/2 then

I can adjust the invoice.

Ok, the invoice was adjusted. It's the same link,

Okay, still can't pay and called bank again and they said nothing holding it. Can I pay through PayPal?

If please send invoice to bablerjackie@icloud.com

Yes. I'll send that shortly.

Also, my name is Jacqueline Babler if you can message me under that account.

Actually either is fine.

This one has my maiden name

Can you send me everything you are doing as well? In addition are you designing it? Just want to make sure. I would like to be involved in that.

Yes. We'll have weekly updates with what we are doing. The first week is the longest, just because there is such much to do as far as setup goes.

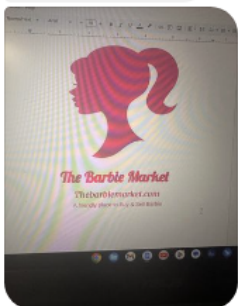

Sent the PayPal:
<https://www.paypal.com/invoice/p/#INV2-79UL-4GVD-8A48-JGOE>

www.paypal.com

Do you have a logo yet?

And I'm assuming Barbie Pink/White for colors?

light pink please

That looks great. Can you send me a PG version of that with a transparent background?

Please don't include 2nd part. I have new phase

We usually don't include taglines or slogans with the logo anyway.

what is your phone number

or email

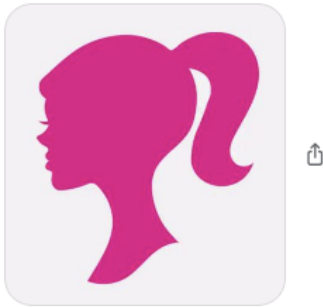

920 770-3330 - chad@qolos.com

email is better for the logo.

So I get put it up on my computer and save it to our project management system

I don't see it yet

did picture come through

Ok. that isn't a transparent background but I can work with it.

okay, great, thanks!

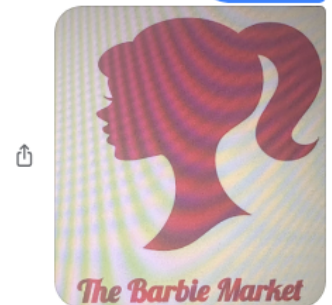

Do you just want the icon on the website, or do you want it to say The Barbie Marketplace?

Can it be both?

I guess not sure what you mean

Yes. That's actually what I meant

Like this:

Also, eventually want to make an app, do you know how to do that?

Yes. We make apps too.

How much is that just so i can get an idea?

Depends on what the app does. But just so you know, you essentially have to make 2 apps - 1 for Android and another for Apple

So it gets pricey.

okay, thanks

Ther's ways to do it cheaper, but it doesn't go on the Apple Store then. It's called a PWA, which is basically a website that acts like an app

okay, we can wait on that

Just wanted you to know the options

Just wanted you to know the options

how much is that

Again, I'd have to understand what it does. If it's the same as what your store does online, then it will be under \$7K - maybe less

Because we can reuse a lot of the work that we are doing for the current website.

yes, same as website

I look into that later

OK, then you are looking pretty good.

Your website will be mobile-friendly too, so a phone user will have no problems

awesome! thanks

Jan 29, 2024, 4:46 PM

444 Reid St Suite 300 DePere, WI 54115 is my virtual office.

Jan 31, 2024, 2:46 PM

When you start checkout process or distributing funds. Is there anyway we can have seller wait 3 weeks to get money on first order, then after wait the normal amount of time? Also, what do we have for security?

I am just trying to processes in place to limit the amount of fraud.

Jan 31, 2024, 3:06 PM

The reason it takes 2-3 days for the funds to arrive is because the banks verify the transaction. By the time the money reaches the seller's account, the transaction is verified and final.

If the fraud that you are worried about is a stolen card or something like that, there is no way to avoid these. It's a very rare occurrence, but nothing you can do to avoid them.

Jan 31, 2024, 5:23 PM

Fraud is for someone selling something that they never plan on mailing

If I pay them out, how do I get money back

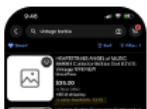

Ahh. You can issue a refund and it'll get pulled from the seller's account.

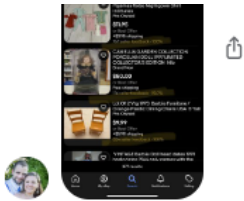

Okay, thanks

Jan 31, 2024, 9:45 PM

Any way you can add? History of Barbie, a barbie buy and sell seminar, how to repair vintage barbie's and where a customer can estimates on their collection. It is also important for me to be able to give seller feedback. Then be able to show this feedback on the seller listing with the number of goods sold.

How do I view site so far?

Feb 8, 2024, 6:42 PM

There's not much to look at yet as most of our work is in the trenches - with architecture and setup. We are reviewing some of the items on your wish list too and seeing if we can't get some of those included at this stage too.

<https://barbie.golos.com/> Keep in mind this is like building a house - it's a process.

The Barbie Marketplace

Okay, why does it say copywrite 2021?

okay

That will get changed to always be the current year.

Feb 9, 2024, 9:52 PM

What do we need to do about getting thebarbiemarket.com my friend currently bought the domain and paid like \$15, how do we get it from him?

The Barbie Market

Should I just have him close it on his end?

Then I am going to start mentioning the site coming. For now can we have the barbie market.com just have logo and have it say "under construction".

Market.com the place to explore and discover top-notch comparisons on your favourite products

This way when I mention it to friends it isn't just this crappy one.

Feb 10, 2024, 3:36 AM

By the way I love this!

Feb 10, 2024, 4:04 AM

Feb 10, 2024, 4:24 AM

Did you see my question above? In addition, I am going to be selling Barbie apparel and accessories. Can you make "shop" "shop barbie" then add a line for "shop Barbie apparel and accessories"

Feb 10, 2024, 6:24 AM

Yes we can do that. You will probably want to transfer the domain to your account, or if your friend wants to give their account. I'm not sure if this is the only domain they own or they have several other domains. If it's just this one, then either is an option.

We also store and manage domains on our customers behalf, so transferring it to our account is an option too.

Once we have control of the domain, we can create a coming soon page

Should they just shut it down then we can set it up?

This is only domain they have

Then I would ask for the password for the account. Then change it once you have it

And pay them the \$15 they invested. 😊

You can shut down the hosting on the website that is currently running. There's probably a monthly fee attached to that

Feb 12, 2024, 4:39 PM

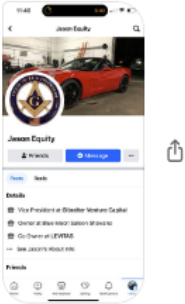

He is just going to unpublished it

Feb 12, 2024, 5:54 PM

That's ok, but you still will need access to it to make the change to the new website later.

Feb 14, 2024, 11:40 AM

I don't know what I am doing, can you reach out to him. His name is Jason Equity, here is his profile picture.

Feb 14, 2024, 11:59 AM

Feb 15, 2024, 2:05 PM

FYI I tried to reach Jason - no reply - although it doesn't appear that he's seen it either.

Feb 16, 2024, 3:09 PM

Okay, I'll reach out to him. What exactly does he need to do?

Feb 16, 2024, 3:25 PM

I'd have him get you a user/password to the account. If he can't do that he can transfer it to you or me. My account is chad@qolos.com

Please be as clear as possible. So he needs to transfer the account to you or me, or what EXACTLY does he need to do?

There's 2 options. Give you the user/password to the account... so you can login.
Or transfer the account to me: Chad@qolos.com
Or a third option, he can connect with me and I can walk him through it.

Feb 20, 2024, 5:35 PM

I guess Jason contact Godaddy and let them know that they can transfer website. Can you please contact them? In addition, can you add, "Get Estimate" to options to click on, then where they can contact me to see if I want to buy their dolls?

Feb 20, 2024, 6:22 PM

Jason would have to initiate the transfer. For security reasons, they wouldn't allow

me to contact them and transfer a domain to our account.

The instructions are here:
<https://www.godaddy.com/help/transfer-my-domain-to-another-godaddy-account-822>

GoDaddy - Transfer my domain to another GoDaddy account

Our customer number is: 280954

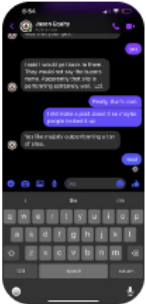

I let him know, thank you!

Feb 20, 2024, 6:43 PM

Guess site is doing well, lol. 🤔

Feb 20, 2024, 7:10 PM

When you called today, did you say you wanted to buy the website or just have it transferred?

Either way is fine, Jason just said someone called from company wanting to buy site. I told him it was probably you.

This is how I know it to work: he has to initiate the transfer - then I'll get a message, and accept it into our account. I didn't indicate anything about buying a website.

Oh shit, now he thinks it is Mattel wanting to buy it.

Hope he doesn't screw me over

Please send him offer for \$15 for site.

lol, it's not, he just said it's doing well.

PREMIUM

\$79.99 \$0.99

buy that now, i'm working on jason!

I can't believe this!

Thank God, does he still have it listed for sale? Can you print screen what you are seeing?

barbiemarket.store

purchased.

GoDaddy

Can you change it to new logo and say under construction? I emailed mattel to ask permission, but we might need to change it to the doll market.com

Market.com

Market.com the place to explore and discover top-notch comparisons on your favourite products

Can you buy domain for
thedollmarket.com just incase.

Pattern by Etsy

Domains include free Privacy Protection forever. ?

thedollshops.com

\$11.99 ~~\$21.99~~
for first year ?

nevermind, i bought this domain incase i cant use barbie

Each seller can create their own shop! i also want to have them submit their drivers
license in order to be a shop owner.
